

Case Study: oprema.

“

In the six years Oprema have been using Springpack, they've offered a flexible approach to cost-effective and bespoke packaging.

springpack 

The Challenge

As our business increased in size, we outgrew our storage space. As an agile, fast growing company we needed a flexible, forward thinking packaging partner that would evolve with us.

“Springpacks willingness to be flexible is one of the things we love most about what they offer. We’ve been able to use tailored products in bespoke sizes and with our branding on. When we were going through a period of exponential growth, they stored boxes for us and replenished them when we needed it. It’s been fantastic to see our two businesses grow side by side over the years.”

The Solution

The Result

Springpack

were really helpful in that they would send out parts of our orders as and when we had the space to fill our facilities. The products are consistently excellent in quality with hardly any damages.

Another great thing about Springpack is that they always give us a heads up when we're running low on stock, so we can keep topped up with ease. They're great at forecasting our usage as a business, and the fact we receive packaging orders with next day delivery means we can continue to offer the same rapid service to our own customers.

Springpack offer a cost-effective solution to quality packaging and have always been willing to help with bespoke sizes for our boxes.

Springpack's competitive costs, along with their helpful online portal for ordering, have been really valuable to our business operations.

They've gone above and beyond to keep delivering innovative solutions for us.
